CC26/DIST/XXVI-07/CFCC907D6Y1845

CERTIFICATE OF COMPLETION

is proudly presented to

KEVIN ARDIANSYAH

for successfully completing **Coding Camp 2026 powered by DBS Foundation**, **specializing in Full-Stack Web Developer**, with **Distinction**.

Coding Camp is a highly selective IT training program, developed in collaboration between DBS Foundation and Dicoding, designed to equip individuals with essential technical, financial, English, and soft skills for success in the workforce.

Program Period: February 9, 2026 - July 20, 2026

July 21, 2026

• 2026 •
DISTINCTION GRADUATE

Narenda Wicaksono
Chief Executive Officer
Dicoding Indonesia

Mona Monika
Head of Group Marketing & Communications
PT Bank DBS Indonesia

CODING CAMP
POWERED BY DBS FOUNDATION
ROAD TO FUTURE WORKFORCE

STUDENT LEARNING ACHIEVEMENT

Cohort ID : CFCC907D6Y1845
Name : Kevin Ardiansyah
University : Universitas Yatsi Madani

Completion Status : Full Graduated
Learning Path : Full-Stack Web Developer
Capstone Status : Completed

No	Courses/Specialization/Activities	Learning Outcome	Hours	Score (0-100)	Score Description
1	Basic Programming for Software Developers	By the end of the course, students are able to modify software applications using flowchart guidelines and program using basic HTML, CSS, and JavaScript in accordance with the application's specifications and functionality requirements.	9	92	Students are excellent in modifying software applications using flowchart guidelines and programming with HTML, CSS, and basic JavaScript in accordance with application specifications and functional requirements.
2	Programming Logic 101	By the end of the course, students are able to explain basic programming logic and apply it to solve problems encountered in the field of software development.	6	91	Students are excellent at explaining basic programming logic and applying it in problem-solving within the Software Developer field.
3	Basic Cloud Computing and Generative AI on AWS	By the end of the course, students are able to explain AWS Cloud, including its various services, global infrastructure, and pricing.	18	96	Students are excellent at explaining AWS Cloud, including its services, global infrastructure, and pricing.
4	Basic Web Programming	By the end of the training, students are able to create a simple website using programming code that meets global standards	45	88	Students are excellent in developing a simple website using programming code that follows global standards.
5	Basic Javascript Programming	By the end of the class, students are able to write programs in JavaScript using Node.js and a text editor such as Visual Studio Code.	46	96	Students are excellent in developing programs using JavaScript with Node. js and text editors such as Visual Studio Code.
6	Build Front-End Web Applications for Beginners	By the end of the class, students are able to create interactive front-end web applications with storage features using web storage.	45	96	Students are excellent in developing interactive front-end web applications with data storage features using web storage.
7	Build Web Apps with React	By the end of the class, students are able to build web applications using React that utilize functional components, stateful components, and controlled components.	35	90	Students are excellent in developing web applications using React, utilizing functional components, stateful components, and controlled components.
8	Web Apps Fundamentals with React	By the end of the course, students will be able to build a web application with React that implements property validation, routing, component lifecycle, context, and hooks.	55	96	Students are excellent in building a web application with React that implements property validation, routing, component lifecycle, context, and hooks.
9	Back-End Development for Beginners with JavaScript	By the end of the course, students are able to create a simple back-end application in the form of a RESTful API using Node.js.	50	90	Students are excellent in developing simple back-end applications in the form of RESTful APIs using Node.js.
10	Back-End Fundamentals with JavaScript	By the end of the course, students are able to build RESTful API back-end applications by implementing databases, authentication and authorization, message brokers, storage, and caching according to real-world use cases.	90	90	Students are excellent in building RESTful API back-end applications by implementing databases, authentication and authorization, message brokers, storage, and caching according to real-world use cases.
11	Capstone / Final Project	Students are able to complete the final project, namely the development of an application/solution that is done to facilitate product development skills and add to the portfolio.	250	96	Students are excellent in completing the final project, which involves developing an application/solution to validate product development skills and enhance their portfolio.
12	Soft Skills & Career Development	Students are able to apply the materials related to personal development, communication, networking, and interview preparation.	294	89	Students are excellent in applying soft skills related to personal development, communication, networking, and interview preparation.
